

Freelance ActionScript 2.0 / 3.0 Developers

AVT Connect is a dynamic business communications agency providing consultancy, design and technical production for live events and digital media.

Our digital team produces quality, cutting edge video and web content that enables our clients to communicate with a global audience. We regularly produce live and on-demand webcasts alongside E-Learning presentations.

Rich media content produced by AVT is used across the education, training, financial, membership-based and healthcare sectors.

To support current growth we are seeking experienced freelance Flash developers.

Working on a number of digital projects your responsibilities will include the development of our new Adobe Flash based 'Virtual Meetings & Learning Platform'.

The ideal candidate will have experience of working within a digital agency or commercial environment.

Knowledge and skills

- Advanced knowledge of Flash & ActionScript 2.0 & 3.0 scripting
- MySQL, Photoshop
- Advanced knowledge of XHTML/CSS
- Understanding of the web delivery of Flash video
- Understanding of E-Learning standards e.g. SCORM
- Knowledge of Flex 3 is preferred but not essential

These freelance opportunities are with a small, fun company who takes their work very seriously.

If you like the idea of working with a small team in central Brighton, developing features, and pushing the limits of web & video technology, these opportunities might be of interest to you.

Rate: Negotiable depending on experience

Additional information: Strictly no agencies

How to apply: Please email CV and a covering letter outlining why you are suitable and your daily rates to jobs@avtconnect.com
