

AVT Connect Factsheet - Virtual Meetings Platform (Benefits)

Get the full benefits

Reach the widest audience

Our platform is compatible with PC and Mac and functions perfectly across all the major internet browsers; Internet Explorer, Firefox, Chrome, Safari and Opera.

We use cutting-edge Adobe Flash video streaming technology. From the outset our development team will work with your IT department to resolve any access or firewall issues.

Better user experience

We use the latest encoding technologies meaning your viewers get the best quality video possible. Our user interface has been developed over many years with a focus on usability, so is very intuitive and also looks great.

Integrates with your website & brand

The Virtual Meetings Platform (VMP) is not a boxed product. Far from appearing as a bolted on, bought in service your virtual meetings, presentations & e-learning can be fully branded to complement your corporate identity or match your existing website design. Our team will work with you to develop a unique look and feel for your requirements.

Fully customisable features

Bespoke features can be developed and programmed to match your specific requirements. We have a number of existing features that can be added with ease to your virtual meetings, presentations and e-learning. These include live discussion boards, viewer voting, interactive quizzes, synchronised transcripts and resource centres.

Proven track record

Developed over 10 years mainly for the healthcare, medcomms, pharma, financial and membership-based sectors in Europe and the USA, our platform and services are industry tried and tested. These are just a few of our clients to have benefitted from our technology solutions;

Novartis
sanofi-aventis
CBS Interactive
Wiley Publishing
Abbott Laboratories
Ferring Pharmaceuticals
BCS (British Cardiovascular Society)
CBI (Confederation of British Industry)
CISI (Chartered Institute of Securities & Investment)

Stable and secure

Our web servers adhere to the latest security protocols, are virus protected and hold SSL certificates. Also, as part of our disaster recovery plan our servers are backed-up daily and copies of all our client's work is stored securely offsite.

Anywhere, anytime, any size

From a one hour lunchtime seminar to a three day conference, AVT are the right media production partners to help you increase the impact of your meetings, presentations or e-learning. AVT can also provide filming and full audio visual production in any location through our AVT Live division.

Unmatched service and support

All technology is underpinned by our team of consultants, project managers, designers and developers. We pride ourselves on building and maintaining excellent working relationships with our clients.
